## EXPERIENCE

### Software Developer
August 2025 – Present

*Innovador Infotech Pvt Ltd*
*Kanpur, UP*

- Delivered MSME Assam government portal modules by implementing end-to-end business logic with ASP.NET Core and SQL Server
- Enhanced stability for `msme1connect.up.gov.in` by optimizing ASP.NET MVC workflows and backend services
- Built RESTful APIs for mobile integration using ASP.NET Web API, Entity Framework, and SQL Server
- Developed admin module and APIs for religious events platform using .NET Core Web API
- Optimized database performance by writing efficient stored procedures and data-access code using Dapper

### Software Developer Intern
January 2025 – July 2025

*Innovador Infotech Pvt Ltd*
*Kanpur, UP*

- Implemented MSME portal features with UI flows and backend workflows using ASP.NET MVC, Razor Pages, and .NET Core
- Built authentication services and APIs for content management using ASP.NET Core and SQL Server
- Designed relational database schemas and implemented data-access layer using Dapper and SQL Server

### Frontend Developer Intern
July 2024 – January 2025

*Dcode Pathshala*
*Remote*

- Improved website performance by 25% through React.js component optimization and efficient state management
- Built responsive, reusable React.js components with Tailwind CSS for component-driven UIs
- Implemented design system with Tailwind CSS ensuring consistent UI/UX across devices and browsers

## PROJECTS

**Scrappy AI Tool - CLI-based Autonomous Agent** | *Node.js, TypeScript, Next.js, React, Prisma, PostgreSQL*

- Built a CLI application with Google Gemini AI featuring three modes: conversational chat, tool-enhanced chat with web search and code execution, and autonomous agent generating production-ready applications
- Implemented OAuth 2.0 Device Flow authentication with GitHub provider and RESTful API using Prisma ORM for user management and conversation history
- Enabled real-time AI streaming with Google Search API, code execution environment, and polyglot code generation for web apps, backend APIs, mobile apps, and more

**Gumroad AI Clone** | *Next.js, React, TypeScript, Node.js, Express, MongoDB, Cloudinary, Razorpay*

- Built full-stack digital products marketplace with AI-powered product creation using Next.js, React, and TypeScript
- Integrated Firecrawl API to automate product generation by converting websites into LLM-structured data
- Implemented JWT authentication, Razorpay payment processing, and Cloudinary media management

**E-Commerce Cake Shop Platform** | *Java, Spring Boot, Spring Security, Thymeleaf, MySQL*

- Built secure e-commerce platform with authentication and authorization using Spring Security and MySQL
- Implemented product catalog, search functionality, and order management using Spring Data JPA

## TECHNICAL SKILLS

**Programming Languages:** TypeScript, JavaScript, C#, Java, C++, SQL, Python
**Backend Technologies:** ASP.NET Core, Node.js, Express, Spring Boot
**Frontend Technologies:** Next.js, React.js, TypeScript, Tailwind CSS, HTML5, CSS3, Bootstrap
**Database & Cloud:** PostgreSQL, MySQL, SQL Server, MongoDB
**AI & Tools:** Vercel AI SDK, OAuth 2.0, Git, GitHub, Postman, VS Code, Visual Studio
**Core Concepts:** RESTful APIs, OOP, Data Structures, Algorithms, System Design, Authentication & Authorization

## EDUCATION

### Bachelor of Computer Application (BCA)
2021 – 2024

*Kanpur Institute of Technology*
*Kanpur, UP*

- CGPA: 8.05/10.0 - Graduated
